RELEVANT PROJECTS

Claude Code Plugin Marketplace & Skills

Jan 2026 - Apr 2026

Engineering Enablement & AI Tooling

- Configured a private GitHub repository to serve as an internal **Claude Code Plugin Marketplace**
- Built several AI enabled **Claude Code** & **Claude Desktop** skills and automated workflows for common company use cases
- Provided strategies and education to allow fellow engineers and non-technical team members alike to harness AI tooling

Full-Stack Monitoring Infrastructure

Jan 2025 - Aug 2025

Comprehensive Telemetry & Alerting

- Deployed full observability stack: **Prometheus**, **AlertManager**, **Grafana**, **Loki**, **Mimir**, **Tempo**, and **Pyroscope**
- Built oncall rotation and alerting infrastructure from scratch using the **AllQuiet** platform
- Conducted observability enablement sessions for engineering teams and non-technical stakeholders

Continuous Delivery via GitOps & ArgoCD

Nov 2024 - Aug 2025

Rapid & Consistent Kubernetes Deployments

- Rolled out **ArgoCD** for continuous delivery across all environments and operational tooling
- Refactored and standardized Kubernetes manifests, eliminating configuration drift and redundancy

WORK EXPERIENCE

NoBS Tech

Dec 2025 - Apr 2026

Senior Observability Engineer

- Enhanced **Datadog** data collection, visibility, and alerting across multiple concurrent client engagements
- Identified and implemented cost-optimization strategies for Datadog monitoring
- Introduced AI-assisted development tooling and built custom internal workflows

ReMatter Inc.

Jul 2024 - Aug 2025

Senior DevOps Engineer

- Modernized developer infrastructure by deploying **ArgoCD** for GitOps-based application management
- Architected enterprise observability platform: **Grafana, Prometheus, Loki, Mimir, Tempo, Alertmanager, OnCall**
- Led company-wide infrastructure assessment with strategic recommendations across all DevOps domains

Activision Blizzard Media

Aug 2021 - Jul 2024

Senior DevOps Engineer

- Built and maintained CI/CD pipelines and infrastructure for code testing and deployment at scale
- Standardized infrastructure management using **Terraform** and **Terragrunt**
- Managed distributed compute on **Kubernetes** using **Kustomize, Helm, and ArgoCD**

Freefall Consulting Inc.

Jun 2020 - Jul 2021

Owner / Contractor / Developer

- Contributed to the **edX** open-source platform (top LMS used by MIT, Harvard, and others)
- Provisioned and codified client infrastructure architectures as **Terraform** modules

Flyr Inc.

May 2018 - Mar 2020

Data / DevOps Engineer

- Led development of the Flyr ETL data platform, enabling high-throughput ingestion pipelines
- Redesigned **GCP** resource architecture in Terraform, enabling on-demand client environment provisioning
