

Patrick Cockwell

DevOps Engineer

 Los Angeles, California  pcockwell@gmail.com  +1 805 588 3391

I am DevOps Engineer with a Bachelor's of Software Engineering from the University of Waterloo. My specializations include infrastructure management, internal engineering enablement, and automated tooling and processes. I strive to improve the productivity and velocity of all development teams I work with and strengthen the stability and reliability of our systems.

SKILLS AND QUALIFICATIONS

Tools and Software

- Very experienced with several **GCP** tools including **Cloud Storage**, **Bigquery**, **Kubernetes Engine**, and **IAM**
- Highly proficient with **Amazon Web Services** tools including **EKS**, **RDS**, **S3**, **EC2**, **Route53**, **IAM**, and **Lambda**
- Very strong grasp of **Kubernetes**, and deployment of applications using **GitOps**, **Kustomize**, **Helm** and **ArgoCD**
- Well versed with infrastructure management tools such as **Terraform**, **Terragrunt**, **Atlantis** and **Ansible**
- Extensive experience with observability and monitoring platforms including **Grafana**, **Prometheus**, **Loki**, **Mimir**, **Tempo**, **Pyroscope**, and **AllQuiet/PagerDuty**

Languages

- **Terraform**: Over 9 years of experience working against AWS and GCP resources, including recently released products
- **YAML**: Over 9 years of experience working on Kubernetes applications and Kubernetes YAML manifests, including **Kustomize** and **Helm**
- **SQL**: Over 10 years of experience working with tools including **MySQL** and **PostgreSQL**
- **Python**: More than 10 years of usage and experimentation for scripts and ETL platforms
- **Javascript**: More than 10 years of development on various frameworks

Other Qualifications

- Comfortable working in team environments and very experienced working on small teams
 - Passionate about computer programming, gaming, and particularly DevOps and infrastructure management
 - Fluent in **English** and **French**, along with a basic grasp of **German**
-

RELEVANT PROJECTS

Full-Stack Monitoring Infrastructure

Comprehensive Telemetry & Alerting

January 2025 - August 2025

- Implemented comprehensive monitoring stack with Prometheus, AlertManager, Grafana, Loki, Mimir, Tempo, and Pyroscope
- Configured alerting infrastructure and established oncall rotation management from scratch using AllQuiet platform
- Educated development teams and stakeholders on monitoring best practices and effective observability utilization

Continuous Delivery using GitOps & ArgoCD

Rapid & Consistent Kubernetes Deployments November 2024 - August 2025

- Implemented ArgoCD for continuous deployments and delivery across all operational tooling in all environments
 - Refactored all Kubernetes application manifests to standardized structure and cleanup redundancies
-

WORK EXPERIENCE

NoBS Tech

Senior Observability Engineer

December 2025 - Present

- Enhanced data collection, visibility and alerting capabilities on Datadog
- Identified and implemented cost optimization strategies for Datadog monitoring and alerting
- Managed and contributed to multiple client engagements simultaneously

ReMatter Inc.

Senior DevOps Engineer

July 2024 - August 2025

- Modernized developer infrastructure by deploying ArgoCD for GitOps application management
- Built enterprise observability platform with full telemetry stack (Grafana, Prometheus, Loki, Mimir, Tempo, Alertmanager, OnCall)
- Led company-wide infrastructure assessment delivering strategic recommendations across all DevOps domains

Activision Blizzard Media

Senior DevOps Engineer

August 2021 - July 2024

- Developed CICD infrastructure and pipelines for code testing and deployment
- Modelled existing and new infrastructure needs using Terraform and Terragrunt to standardize infrastructure management
- Managed distributed computing systems using Kubernetes, Kustomize, Helm, and ArgoCD

Freefall Consulting Inc.

Owner/Contractor/Developer

June 2020 - July 2021

- Worked on prominent edX open-source software project
- Provisioned infrastructure and codifying architecture in Terraform module code

Flyr Inc.

Data/DevOps Engineer

May 2018 - March 2020

- Led the development effort for the Flyr ETL data platform
- Implemented a full redesign of GCP resource architectures using Terraform that enabled deployment of new client infrastructure on demand

CERTIFICATIONS

HashiCorp Certified: Terraform Associate

April 2025

CNCF Certified Kubernetes Administrator

April 2024

EDUCATION

University Of Waterloo

Bachelor of Software Engineering (BSE)

September 2009 - March 2015
