Patrick Cockwell

DATA ANALYSIS · REPORTING · AUTOMATION

Los Angeles, California pcockwell@gmail.com +1 805 588 3391

10+
YEARS SQL & PYTHON

> Analytical engineer (Waterloo BSE) with 10+ years building data platforms, reporting tools, and automation that drive accurate, cost-aware decisions. Now bringing **SQL**, **Python**, and **AI automation** skills to budgeting, forecasting, and financial reporting.

SKILLS & TOOLS

DATA & ANALYSIS	`SQL` `Python` `BigQuery` `Redshift` `PostgreSQL` `Airflow` `ETL Pipelines` `Data Warehousing`
BI & VISUALIZATION	`Grafana` `Datadog Dashboards` `Trend & Anomaly Alerting`
COST MANAGEMENT	`Usage & Spend Analysis` `Vendor Cost Optimization`
AI & AUTOMATION	`Claude Code` `Cursor` `Notion AI` `Workflow Automation`
SPOKEN	`English (native)` `French (fluent)` `German (basic)`

RELEVANT PROJECTS

AI-Powered Workflow Automation
Jan 2026 - Apr 2026

Process Automation & AI Enablement

- Built **AI-enabled skills and automated workflows** (Claude Code & Claude Desktop) for recurring manual tasks
- Set up a private internal marketplace so teams could find and reuse automations from one shared, maintained source
- Trained engineers and **non-technical team members** to apply AI tools to their own day-to-day work

Centralized Reporting & Dashboard Platform
Jan 2025 - Aug 2025

Data Visualization & Stakeholder Reporting

- Built **Grafana** dashboards unifying data from several systems into a single view
- Designed alerting that flags unusual trends and deviations from expected levels, and routes them to the right owner
- Ran training sessions teaching engineering teams and **non-technical stakeholders** to read the data and act on it

WORK EXPERIENCE

NoBS Tech
Dec 2025 - Apr 2026

Senior Observability Engineer

- Analyzed **Datadog usage and spend** and implemented **cost-optimization strategies** for clients
- Met with clients to understand their needs, then built custom solutions across several engagements at once
- Improved data collection and visibility so clients had accurate, complete operational reporting
- Introduced **AI-assisted tooling** and built custom internal workflows to automate repetitive work

ReMatter Inc.
Jul 2024 - Aug 2025

Senior DevOps Engineer

- Led a **company-wide assessment** of infrastructure, tooling, and processes and delivered strategic recommendations
- Built the company's reporting and observability platform, giving teams a **single source of truth** for operational data
- Optimized cloud resources to **reduce costs** while improving application performance

Activision Blizzard Media
Aug 2021 - Jul 2024

Senior DevOps Engineer

- Built and maintained **automated pipelines** for testing and deploying code at enterprise scale
- Standardized infrastructure management with **Terraform** and **Terragrunt** for accuracy and repeatability

Freefall Consulting Inc.
Jun 2020 - Jul 2021

Owner / Contractor / Developer

- Founded and ran an independent consulting business, handling client engagements from start to finish
- Contributed to the **edX** open-source platform (a leading learning platform used by MIT, Harvard, and others)

Flyr Inc.
May 2018 - Mar 2020

Data / DevOps Engineer

- Led development of an end-to-end **ETL platform** (Airflow, Kafka, **BigQuery**) ingesting **terabyte-scale** customer data
- Rebuilt **GCP** architecture in Terraform so each new customer got a secure, isolated environment on demand

Agari
May 2016 - Apr 2018

Software / DevOps Engineer

- Researched and compiled IP address data to ensure the **correctness of internal data stores**

Breeze Labs
Mar 2015 - Apr 2016

Software & Data Engineer

- Owned and enhanced the company's **entire data and analytics infrastructure**
- Built tools that improved the **accuracy and reliability of reports** to external parties
- Integrated complex external data sources, from **credit reports** to vehicle location and mileage

Hearsay Social
Jul 2014 - Feb 2015

Software Engineer

- Designed and built a **data warehouse** product and its ETL process (S3, **Redshift**, Python)
- Parallelized data extraction and transformation for faster loads, within strict client data-security requirements

INTERNSHIPS & EARLY CAREER

GREE, Inc. · Analytics Engineering Intern — 2012

Built analytics dashboards from scratch and helped design analytics databases for games in development

Funzio · Software Developer — 2011

Analytics and database developer; built tools and dashboards used heavily across multiple games

EDUCATION

University of Waterloo · Bachelor of Software Engineering (BSE) — 2009 - 2015

TECHNICAL CERTIFICATIONS

Datadog Fundamentals & APM (2026) · OpenTelemetry Associate (2025) · Terraform Associate (2024) · CKA & CKAD (2024)
